

SMART DATA FOR BETTER BUSINESS

NOW YOU'RE TALKING

Insights gained from connected assets and devices are enabling businesses to deliver growth and efficiency like never before. With a range of quality connectivity solutions, a global partner eco-system and access to leading data scientists, Spark can help you connect the right IoT solution. Here's how to get started step by step:

1

ASSESS YOUR NEEDS

What do you need to solve?
Will you need data in real-time or batches?
Is long battery life important?

2

CHOOSE YOUR CONNECTIVITY

Long battery life, low data usage? Choose our Connected IoT-Low Power network
OR
Need real-time data? Choose our Connected IoT-Mobile network

3

SELECT AND MANAGE YOUR DEVICES

Select your devices, then manage them via one of our leading, global-standard platforms.

4

CREATE YOUR DASHBOARDS

Will you use built-in dashboards or build your own to turn your data into actionable insights?
